

KLR-Series Amplifiers

The Ashly KLR Series are lightweight, high-performance amplifiers using latest technologies to deliver quality and value. Suited to professional performance audio or fixed installation KLR Series amplifiers cover a power range from 1000W to 2500W per Channel at 2Ω.

The KLR-2000 use A/B technology whilst the KLR-3200, KLR-4000 and KLR-5000 use a 2-step Class H-Design. All KLR-Series use a switch mode power supply.

nX-Series Amplifiers

The Ashly nX Amplifier Series is available in 2 or 4 channel models to meet the most demanding live sound or fixed installations.

Rear panel dip switch settings allow switching between either High-Z (70V or 100V) and Low-Z (down to 2Ω) output per channel. Sleep mode draws < 1 Watt of energy.

ne-Series Amplifiers

The Ashly ne Multi-Channel Amplifier Series is available in 4 or 8-channel models and are network enabled for set-up and control using standard 10/100 Ethernet protocol.

Low impedance or high impedance models and optional AES3, Mic or Cobranet® Option cards provide complete flexibility.
