

## XR2500

**BITTNER**  
AUDIO

The Bittner XR2500 Power Amplifier - lightweight with enormous power output, on-board DSP and Network or local control options.

The Bittner XR2500 also has "alive contacts" allowing use with the Bittner AX16 and SXL II which means performances never miss a beat! Ideal for Fixed Installations, Touring and Theatres.

Further Information is available: [Click Here!](#)

### XR2500 Features:

- On-Board DSP
- 2-Channel Output
- 1000W @ 4Ω per Channel
- Remote Level Control
- Remote Power On
- Network Ready

If you would like to become a Bittner Audio Dealer  
email [sales@sounddirections.co.uk](mailto:sales@sounddirections.co.uk)

## AX16

**BITTNER**  
AUDIO

The Bittner AX16 Amplifier Back-Up Switch provides maximum operational safety as well as ensuring performances run seamlessly!

When triggered the inputs and outputs of a 'defective' amplifier channel are inaudibly switched to another amplifier channel, automatically matching all level settings.

Further Information is available: [Click Here!](#)

### AX16 Features:

- Up to 16 Channel Amplifier Switching
- Operates via Alive Contacts or SXL II
- Three Switching Modes
- SXL Dataport

If you would like to become a Bittner Audio Dealer

## SXL II

**BITTNER**  
AUDIO

The Bittner SXL II Programmable Control Interface provides power management, amplifier control and monitoring within venues of any size.

The SXL II can be embedded within a network or used as a stand-alone tool, controlled via the internet or simply with the push of a button.

Further Information is available: [Click Here!](#)

### SXL II Features:

- Network Management
- Local or PC Set Up
- SD Card Back Up
- Integrated Web Server
- Monitors Voltage & Current
