Experts in Directional Sound

Directional Sound can be complex, soundwaves are typically omni-directional, particularly low-end bass frequencies, which can make them difficult to control and direct without specialist knowledge.

If you have a Directional Sound requirement, we'd be delighted to help you.

Sound Reinforcement

Experts in Sound Reinforcement

A well designed sound reinforcement system should deliver a constant sound pressure level (SPL) and constant frequency response over the entire listening area.

If you are designing a sound reinforcement system, we can help you.
