

Ashly Pema 8250

Pema™ with it's new sleek look, is a Protea-Equipped Media Amplifier—8-channels at 250 Watts per channel. Pema is a matrix mixer—all Pema models have a full 8-in x 8-out matrix mixer, where any input can be assigned to any output or outputs.

Pema features Ashly's energy efficient Class-D amplifier topology with a switching power supply—and is over 80% energy efficient out of the box. Use the event scheduler to either put the Pema in stand-by mode or turn it off completely. Pema is offered in separate Low-Z or 100V constant voltage models.

Pema DSP features also include;

- Gain Sharing Auto Mic Mixing
- Feedback Suppressor
- Ambient Noise Detection
- Real Time Clock / Scheduler

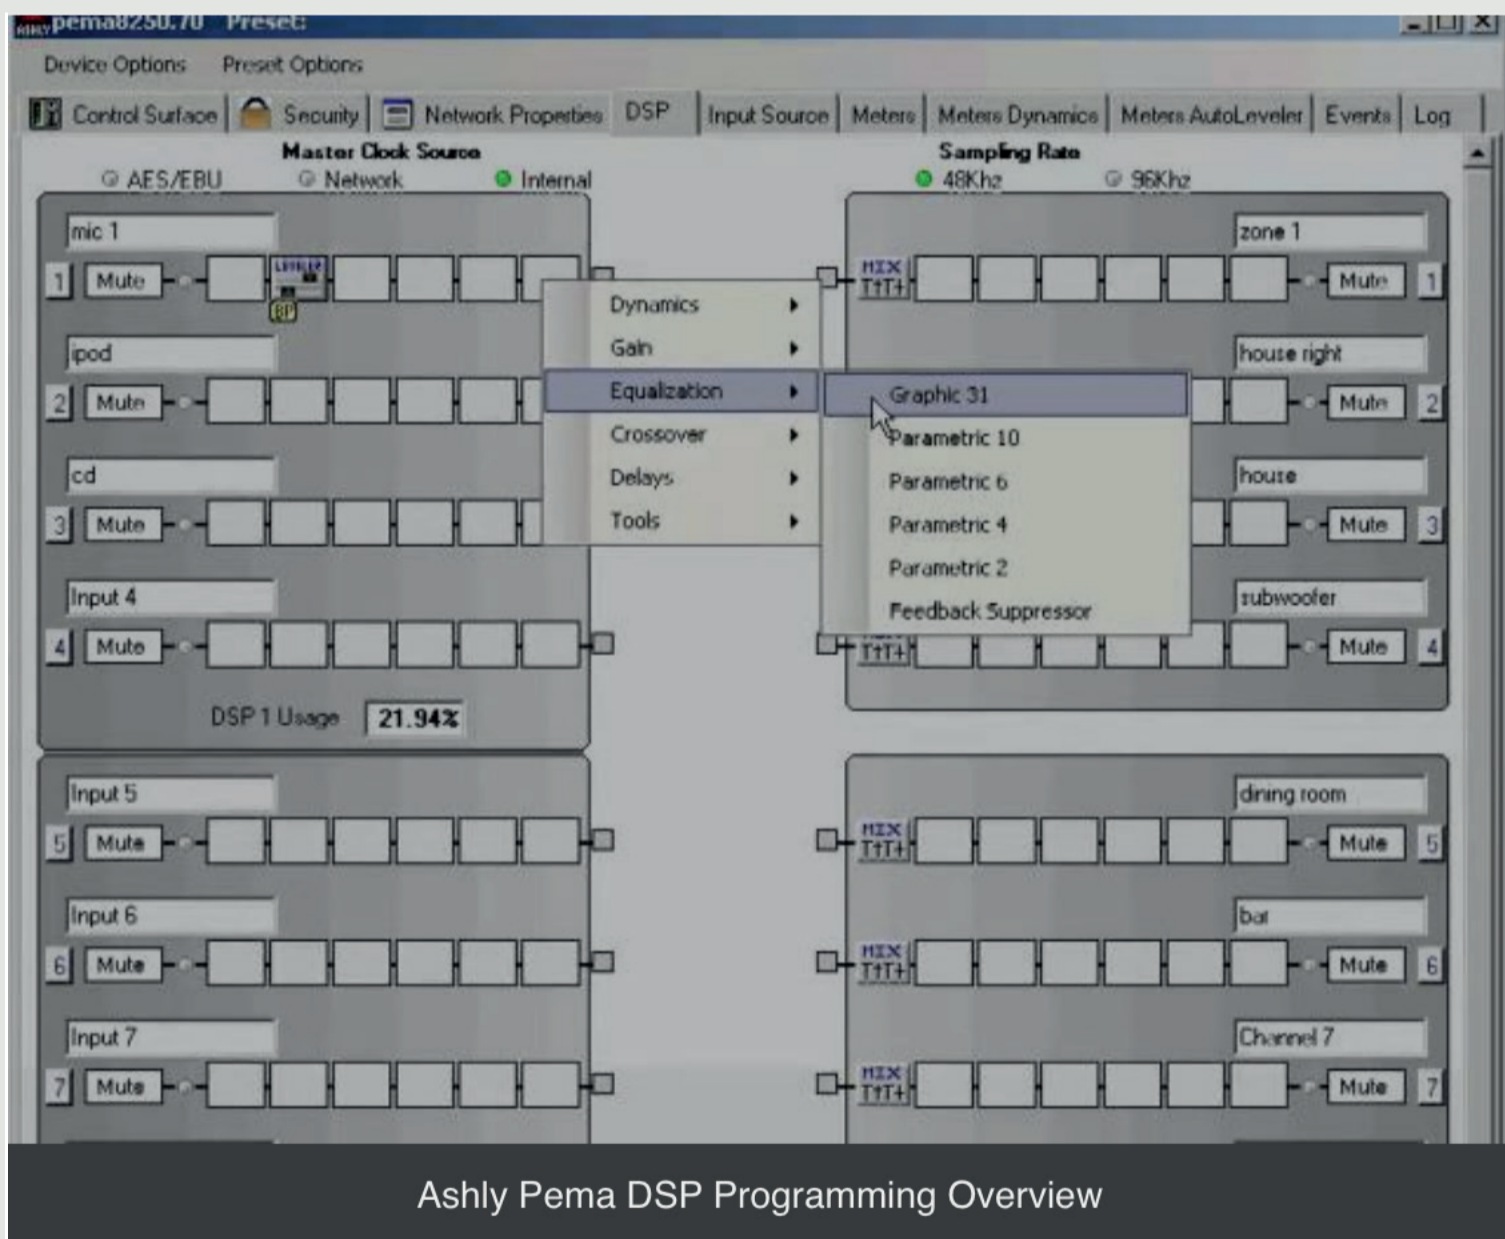

Rear Panel In/Outs

Pema™ is equipped with a complete host of input / output connections along with an optional digital I/O slot. It features eight input options, one per channel that can be balanced, unbalanced or summed mono.

The Pema also features eight separate speaker outputs, one per channel and eight preamp outputs, one per channel. Additional features also include connections for up to eight separate analogue remote level controls, one per channel, remote standby, preset recall and data connections. An ethernet Data Link RJ45 port is also standard.

Rear Panel Input Options include;

- 8 x Balanced Mic / Line
- 8 x Unbalanced
- 8 x Mono Summed
